PROFILE

Bachelor of Information Technology (Honours) graduate specializing in Software Engineering, with knowledge of full-stack web development, software design, and database management. Strong problem-solving and analytical skills, with a passion for developing user-focused software solutions. Eager to apply technical knowledge, contribute to impactful projects, and grow as a software engineer.

EDUCATION

Bachelor of Information Technology Honours (Software Engineering) | ESOFT uni (ESU) | GPA: 3.56 | Sep 2022 - Sep 2026

G.C.E Advance Level | Bandaranayake Central College, Veyangoda | 2018 - 2019

G.C.E Ordinary Level | Bandaranayake Central College, Veyangoda | 2015

AWARDS & RECOGNITION

Top Performer in Bachelor of Information Technology (Honours) Degree | ESOFT Uni | Sep 2026

- Awarded as a Top Performer at ESOFT UNI Graduation 2026 for outstanding academic performance in the Bachelor of Information Technology (Honours) Degree.

WORK EXPERIENCE

Full-Stack Software Developer Intern

Techseed Lanka PVT (LTD) | Jan 2026 – Present

- Developed and maintained enterprise-grade HRM and Attendance Management systems using Laravel, Vue.js, PHP, and MySQL, delivering scalable and maintainable full-stack solutions.
- Designed and implemented RESTful APIs, responsive Progressive Web Applications (PWA), and reusable Vue.js components to enhance user experience across desktop and mobile platforms.
- Optimized application performance, resolved production issues, implemented new features, and supported deployment while following software engineering best practices and Agile workflows.

PROJECTS

Nutri-Assist – Meal Planning & Health Tracking System | 2024 – 2025

Technologies: Python, Flask, JavaScript, HTML5, CSS3, MySQL, REST APIs

- Developed a meal planning and health tracking web application that provides personalized meal recommendations, calorie and nutrition tracking, grocery and kitchen stock management, smart health notifications, and interactive dashboards, delivering a culturally adapted solution for Sri Lankan users through a responsive full-stack architecture.

Fresh Chef – Food & Beverage Delivery and Catering System | 2025

Technologies: PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap.

- Developed a full-stack food ordering, delivery, and catering web application featuring role-based authentication, online ordering, catering management, order tracking, secure payment processing, complaint management, and an analytics dashboard, providing a responsive platform for customers, restaurant staff, delivery riders, and administrators.

VersionDesk – Interactive Project Management & Communication Hub | 2026

Technologies:React, TypeScript, Vite, Tailwind CSS, Figma

- Designed and developed a high-fidelity interactive prototype for software project management, featuring role-based user interfaces, a drag-and-drop Kanban board, project and version tracking, client inquiry management, dashboard analytics, and voice interaction concepts, applying Human-Computer Interaction (HCI) principles to improve usability and collaboration

StorySpace – Advanced Blog System | May 2026

Technologies: Django 5, Python, HTML5, CSS3, JavaScript, Bootstrap, SQLite.

- Developed a full-featured blog application with secure user authentication, role-based administration, post management, commenting, and a modern responsive user interface, emphasizing real-time interactions and an enhanced user experience.

FitLife – Gym Management System | Mar 2026

Technologies: Java, Java Swing, MySQL.

- Developed a desktop-based gym management application with role-based authentication, staff and program management, member booking, automated booking cost and salary calculations, and CRUD operations, providing an intuitive graphical interface with efficient database connectivity and modular object-oriented design.

Ethical Study of the Social Impact of User Perception and Trust in AI-Generated and Manipulated Images | 2026

- Conducted an independent undergraduate research study investigating how user awareness, perceived realism, and source credibility influence trust in AI-generated and manipulated images among Sri Lankan social media users. Designed a quantitative survey, collected and analyzed data from 70 respondents, and performed reliability, validity, and regression analyses to evaluate the relationships between key variables and user trust

SKILLS

- **Technical skills**: Laravel, Vue.js, PHP, Java, C, C#, Python, JavaScript, TypeScript, React, HTML5, CSS3, MySQL, RESTful APIs, Java Swing, JDBC, Bootstrap, Object-Oriented Programming (OOP)
- **Tools**: Git, GitHub, Visual Studio Code, NetBeans, Figma, MySQL Workbench, XAMPP, Postman, ClickUp, Linux, Nginx
- **Soft skills**: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Time Management, Adaptability, Critical Thinking, Attention to Detail, Agile Development
- **Language**: English (Professional Working Proficiency), Sinhala (Native Proficiency)
